

Supplementary File 1

This is the complete table of regression results from the paper “Space and Interaction in Civil Society Organizations: An Exploratory Study in a U.S. City.” It corresponds to Table 2 in the main text. This table includes all the values from Table 2 plus results for all control variables.

Table S1. Estimated Effects of Space Characteristics on Conversational Interaction (Full Models)

	Any Informal Conversation	# of Pre-Convening Talkers	# of Post-Convening Talkers
Space Characteristics			
Small Footprint ^a	-2.557*	-0.742*	-0.432
	(1.10)	(0.34)	(0.33)
Large Footprint ^a	-0.216	-0.324	-0.282
	(0.68)	(0.30)	(0.33)
Outdoors ^a	0.001	0.117	-0.573
	(1.26)	(0.49)	(0.50)
Convener Controllable	0.754	-0.119	0.204
	(0.71)	(0.27)	(0.29)
Controls			
Intended Interaction	-1.329	0.172	-0.261
	(0.69)	(0.29)	(0.29)
Restricted Attendance	0.201	0.302	-0.014
	(0.71)	(0.30)	(0.29)
Total Participants (log)	0.148	0.733***	0.839***

	(0.26)	(0.12)	(0.12)
Constant	(0.249)	-0.040	0.227
	(1.21)	(0.57)	(0.54)
Model Type	Logit	Neg. Binomial	Neg. Binomial
Alpha (ln)		-0.567**	-0.541**
Model Log-likelihood	-53.612	-216.930	-233.875
χ^2	17.519*	45.968***	62.583***
Pseudo-R ²	0.140	0.096	0.118
N	92	61	61
